ACC II: THE NEXT STEP TOWARD CLEAN CARS

• The **Clean Air Act** allows California the ability to develop its own rules for governing transportation emissions — states then can independently adopt these rules under Section 177 of the CAA. Advanced Clean Cars II is the follow-up policy to Advanced Clean Cars I, which instituted a minimum EV sales requirement for auto manufacturers.

• ACC II picks up where ACC I left off and continually increases the percentage of EV sales until reaching a 100% EV requirement in 2035.

• ACC II also institutes technology standards which will improve the quality of EVs in several ways, including requiring the provision of charging cords when vehicles are sold, making it easier to get service on an EV, and improving both the range and durability of batteries in the vehicles.
ABOUT OUR PANELISTS

Juan Roberto Madrid
Colorado Clean Transportation & Energy Policy Advocate
GreenLatinos

Anna Wong
Manager, ZEV Market Advancement Section
California Air Resources Board

Chris Harto
Senior Policy Analyst Transportation and Energy, Consumer Reports

Aaron Kressig
Transportation Electrification Manager
Western Resource Advocates
THANK YOU
